RADIOLOGISTS: ADVANCE YOUR CAREER TODAY!

Join us for this 1 day intensive course designed for practising Radiologists, fellows, residents, medical students, medical radiation technologists, and sonographers that will focus on practical strategies to correctly interpret commonly encountered diagnostic problems from head-to-toe, recognize image quality issues, and provide tips for consultative recommendations based on developed practice guidelines.

This course covers all aspects of radiology including Neuroradiology, Chest, Abdominal Imaging, Interventional, Nuclear Medicine, MSK, and Women's Imaging, providing a practical approach to identification of pathological findings, differential diagnosis, review of anatomy, and management recommendations.

COURSE OBJECTIVES

At the conclusion of this activity, participants should be able to:

1. Identify common day-to-day pathologic conditions
2. Review relevant anatomy
3. Recognize image quality issues
4. Review common practice guidelines
