# Breast Cancer Screening Updates for Family Physicians & Nurse Practitioners

**Saturday, October 18, 2025 | 8AM-11:45 PM**

**REGISTER NOW**

## Why I Should Register for this Course

This course offers practical, up-to-date information on the latest breast cancer screening guidelines and management strategies, with a special focus on early screening and dense breast considerations. Attendees will gain actionable insights from leading experts, learn effective referral and communication strategies, and hear directly from a patient advocate. The event is designed to empower primary care providers with tools to optimize patient outcomes and ensure all eligible patients receive appropriate screening and follow-up.

## Overall Learning Objectives

Describe recent changes in Canadian and Ontario breast cancer screening guidelines, including earlier screening age and dense breast management.

Recognize the importance of early detection and its impact on treatment options and outcomes.

Discuss workflow considerations for breast cancer screening and management from both the radiologist and GP perspectives.

Identify current epidemiological trends and risk factors for breast cancer in Canada.

Apply best practices for patient referral and communication between primary care and radiology.

Appreciate the patient experience and advocacy in breast cancer screening and care.

## Schedule

- 8:00 – 8:30 AM – **Opening Remarks & Breast Cancer Epidemiology and Risk Factors** | Dr. Maya Grisaru Kacen
- 8:30 – 9:00 AM – **Screening at a Young Age** | Dr. Jean Seely
