Course Objectives:

At the end of this event, participants should be able to:

Apply the OAR Canadian Bone Mineral Densitometry Reporting Standard to produce consistent BMD reports

- Discuss the critical importance of implementing the Canadian Association of Radiologists Technical Standards for Bone Mineral Densitometry Reporting 2013 to achieve standardization in reporting of examination results

- Explain how to use the CAR guidelines to avoid pitfalls in the reporting of DXA

- Explain the critical importance of accreditation to facilitate BMD reports that are accurate, easier to read and understand, and which provide the referring physician with a better understanding of the patient’s bone health

- Review and discuss how to use the CAR guidelines in the reporting of diagnostic category and 10-year absolute fracture risk, with emphasis on the appropriate use of NHANES III white female database for fracture risk determination

- Review and discuss the critical role of the imaging physician in monitoring the technologist’s performance of DXA

- Assess and relate the importance of precision and apply the concept of least significant change (LSC) in determining the validity of any interval change in bone mass that may occur with changes in the patient’s health status, or as a response to treatment

- The CanMeds role being addressed in this course is medical expert.

Note: Each of the speakers in the Workstation Case Review sessions will be working with participants using the OAR CBMD reporting standard (on their individual workstations) to build reports using a report builder program developed specifically for the CBMD physician courses, based on the OAR CBMD Report Standard.

Case studies will emphasize the CAROC 2010 criteria for the determination of 10-year absolute fracture risk. The case studies will utilize the “Canadian Association of Radiologists Technical Standards for Bone Mineral Densitometry Reporting”, Siminoski et al, CARJ 64 (2013) 281-294 to address a wide range of clinical situations.

Emphasis will also be placed on the appropriate use of NHANES III white female database for fracture risk determination.

Course Director:

David Lyons, MD, FRCPC

OAR Medical Director, Facility Accreditation and OAR Medical Advisor, Continuing Medical Education Accreditation Programming

Dr. David Lyons received his medical degree at Queens University at Kingston and training in diagnostic imaging at Toronto General Hospital, University of Toronto.

Dr. Lyons has more than 25 years of experience in diagnostic imaging with special interest in BMD and ultrasound. As a radiologist involved in the reporting of DXA scans, he has a special interest in, and is a strong advocate for, quality assurance and quality control in the performance and reporting of Bone Mineral Densitometry.

Dr. Lyons pioneered the CBMD Facility Accreditation Program and has played a vital role in the OAR’s continuing medical educational courses (CME) to support the Facility Accreditation Program. He extended BMD CME to the education of technologists who form the backbone of the accreditation process, and was responsible for developing the Accredited Densitometry Technologist (ADT) recognition for technologists who successfully complete an examination targeted to the accreditation process, and maintain continuing educational requirements set forth in the CBMD policies and procedures for accreditation.

He represented the CAR/OAR on the Osteoporosis Canada panel leading to the CAROC 2005 recommendations, which introduced the concept of 10-year absolute risk for fracture risk prediction, and later was the OAR representative on the panel updating fracture risk assessment to the CAROC 2010 fracture risk assessment tool.

Dr. Lyons is involved in both hospital (the Deep River and District Hospital in northeast Ontario) and clinic practice (SDI Ultrasound Calgary). He remains a driving force behind Facility Accreditation and CME.
Speakers:

**Cigdem Akincioglu, MD, FRCPC, EBNM**

Dr. Akincioglu is Associate Professor, Department of Medical Imaging, Western University and Program Director, Nuclear Medicine Residency Training Program at London Health Sciences Centre, University Hospital in London, Ontario.

Originally from Turkey, Dr. Akincioglu attended Gaza University in Ankara, where she completed both her MD and residency education. After finishing her residency, Dr. Akincioglu completed a fellowship in Cardiac Imaging at Cedars-Sinai Medical Centre in Los Angeles, California. She joined the team at Western University in 2006, and was promoted to Associate Professor in 2010. Dr. Akincioglu has also been the Nuclear Medicine Residency Program Director at Western since 2010. Her research interests are focused primarily on the improvement of cardiac imaging methods and protocols, correlative and hybrid/fusion imaging and the use of novel tracers in myocardial imaging.

**S. Nimu Ganguli, MD, FRCPC, ABNM**

Dr. Ganguli is Director of Nuclear Medicine, William Osler Health Centre and Brampton Civic Hospital and is an Adjunct Lecturer, Department of Medical Imaging, University of Toronto. Previously he spend seven and one-half years as Site Director of Diagnostic Medical Imaging for the Brampton Civic Hospital.

Dr. Ganguli is a former member of the Canadian Association of Radiologists Board of Directors, a position he held for seven years. While with the CAR, he served on the CAR Board working group and was one of the authors of the national CAR Technical Standards for Bone Mineral Densitometry Reporting 2013. He also worked with Osteoporosis Canada on a Care Gap paper for assessing fractures on chest x-rays and other imaging studies that may relate to undiagnosed Osteoporosis.

An avid proponent for facility accreditation, Dr. Ganguli is responsible for achieving OAR CBMD Facility Accreditation for two Independent Health Facilities (IHF sites) and on Hospital Site.

**Ian Hammond, MD, FRCPC**

Dr. Hammond is a staff radiologist at the Ottawa Hospital and Professor of Radiology at the University of Ottawa. He also practices at a number of community hospitals in the Ottawa Valley, reporting BMD at Winchester, Arnprior, Renfrew, and Barry’s Bay.

Dr. Hammond is a recent past member of the Ontario Association of Radiologists’ Board of Directors and a past President, and Gold Medal Winner, of the Canadian Association of Radiologists. He has been President of the Canadian Radiological Foundation since 2011.

---

**OPTIONAL CBMD REPORTING PROFICIENCY EXAM**

A proficiency exam to earn a certificate demonstrating proficiency in BMD reporting as per the Canadian Association of Radiologists (CAR) Technical Standards for Bone Mineral Densitometry Reporting 2013 has been developed following repeated requests from radiologists and other physicians reporting BMD who have participated in past OAR CBMD CME programs.

The Proficiency Exam is optional! Reading physicians who pass the Proficiency Exam will receive a certificate verifying their proficiency in BMD standardized reporting as per the national CAR reporting guidelines and the OAR Canadian Bone Mineral Densitometry Reporting Standard.
Location:
Twenty Toronto Street
Conferences and Events
20 Toronto Street
2nd Floor
Downtown Toronto

OAR CBMD PHYSICIAN WORKSTATION CME
REGISTRATION
(Includes meals, refreshment breaks, and course materials)

• OAR Member $650 (Before Apr. 14, 2017) $750 (After Apr. 14, 2017)
• Non-OAR Member $850 (Before Apr. 14, 2017) $950 (After Apr. 14, 2017)

Access to archived versions of the CME program will be made available to all CME participants. Two archived formats will be available. Participants can choose to access the entire event, or access the program on a lecture-by-lecture basis.

Instructions on how to access the archived CME program will be emailed to all participants (live program and webcast of the live program) as soon as they are available.

Archived versions of the CME are usually available within 7 to 14 days of the live event.

CANCELLATION POLICY
For OAR members, if cancellation to this event is necessary please, contact the OAR office for assistance. For non-members, a refund will be made less a $50 processing fee, if cancellation is received in writing two weeks prior of the CME event date. No refunds will be given within two weeks of the CME event. Delegates may substitute an alternate attendee. Please advise the OAR if any changes are made. The OAR reserves the right to cancel or move the conference should it become necessary. In this case, each registrant will be notified by telephone or email and a full refund will be given. Therefore it is important that you provide us with an email address and phone number. The OAR is not responsible for any other costs incurred.

Please note that on-line registration for all OAR CME events is available at:
